

Protect Your organization from being manipulated by deepfake

In today's world, you don't know what is fake and what is not - WE DO!

Who We Are

Truly is the leading real-time deepfake detector, designed to adapt to your organization and effectively prevent social engineering attacks. Our advanced solution safeguards the integrity of digital communications, mitigates misinformation risks, and ensures the security of your operations against the growing threat of deepfake fraud

Why Truly

-  Integrate with your video conferencing tool
-  Study user behavior to auto-customize the detector for your organization.
-  Real time video and voice deepfake detection

The Problem

With the rise of deepfake attempts worldwide, it's challenging to verify that the person you're interacting with is who they claim to be.

- Deepfakes pose risks such as:
- Fraudulent activities (e.g., deepfake fraud)
 - Erosion of trust in digital interactions
 - Threats to financial and personal data
 - Reputational damage to businesses
 - Non-compliance with digital authenticity regulations

46% of CISOs worldwide expressed concern about the rise in AI-powered fraud.
